SUMMARY

Senior UX/UI & Product Designer with 8+ years in B2B SaaS and B2C, web and native mobile. As sole designer of a sportsbook platform across 4 high-traffic sites, reduced design delivery time by 50–70% with AI workflows (Claude Code). Specialized in design systems, data-heavy dashboards, user research, A/B testing and localization across 4 markets.

EXPERIENCE

Senior UX/UI Designer — Revelo (formerly Alto / Celerative)

Apr 2022 – Present · Remote · Alto was acquired by Revelo in 2025 · Client: PayPerHead, a B2B SaaS sportsbook platform for bookmakers (B2B and B2C)

- Cut design delivery time by 50–70% by turning the design systems into Markdown documentation that engineering uses as AI context (Claude Code).
- Cut bet placement from 12 steps to 6 by redesigning the player site end to end as the sole designer and building its design system from scratch: one flexible screen, mobile-first, with 6 color themes built on color tokens.
- Sole designer for a data-heavy platform with 5 user roles and their dashboards, mapping how each change ripples across connected flows and aligning it with stakeholders and business goals.

Senior UX/UI Designer — Elemental Branding (client: TREBEL Music)

Oct 2019 – Apr 2022

- Increased new-user retention by 30% by redesigning the download flow (new Download Queue) from real-user interviews, usability testing and usage data, cutting time to the first 10 songs from 22–26 to 10 minutes.
- Launched the TREBEL podcast experience end to end from scratch: usability and A/B testing, user flows, every screen and navigation, through iOS and Android integration.
- Adapted the native iOS and Android app for 4 markets (Mexico, Indonesia, US, Brazil) and led the full Brazil localization.

UX/UI Designer — Valiot

Sep 2018 – Jan 2019

- Contributed to a 5% improvement in brewing efficiency at Heineken's Cervecería Cuauhtémoc Moctezuma by studying the brewing process on-site and adapting the ValueChainOS B2B platform to the plant teams' needs.

UX/UI Designer — Rocket Business Venture

Oct 2017 – Jul 2018

- Designed two mobile apps from the ground up, a coupon app and a dating app, owning the design end to end from concept and user flows to final UI.

SKILLS

Design: Figma, design systems, theming and color tokens, dashboards and data tables, user flows, information architecture, wireframing, prototyping, mobile-first and responsive web, native iOS and Android, localization

Research and testing: user interviews, usability testing, A/B testing, data-informed design, discovery workshops

AI: Claude Code, Claude Artifacts, Markdown design-system docs for AI workflows

Tools: FigJam, Miro, Photoshop, Illustrator, Jira, Confluence
