Summary

Senior UX/UI Designer with 8+ years of experience designing mobile and web products for the sports betting, music and manufacturing industries. Designs products end to end, often as the sole designer, with results such as a 30% increase in new-user retention and a betting flow cut from 12 steps to 6. Experienced in multi-market localization, design systems, discovery workshops and AI-assisted design workflows with Claude Code.

Experience

Senior UX/UI Designer — Revelo

Apr 2025 – Present · Remote

- Designed a new platform where line management teams map and configure betting lines from third-party providers into the company's system, turning lines with different names and settings into a clear structure that is easy to edit and publish to the player site.
- Migrated the design systems into Markdown documentation for AI-assisted workflows, reducing design delivery time by at least 50%.
- Improve usability across PayPerHead's agent, player and maintenance sites, and explore new ways for players to place and track bets.

Senior UX/UI Designer — Alto (Celerative)

Apr 2022 – Jun 2025 · Remote

- Designed the new PayPerHead sportsbook player site as the sole designer, replacing the previous version and cutting bet placement from 12 steps to 6 on a single flexible screen, with a better mobile experience and more color themes for each brand.
- Built and maintained multiple design systems that unified the company's platforms for agents, players and third-party providers.
- Designed and integrated new features to improve line management and give agents control over their players' wagering limits.

Senior UX/UI Designer — Elemental Branding (client: TREBEL Music)

Oct 2019 – Apr 2022

- Increased new-user retention by 30% by redesigning the download experience with a new Download Queue based on user interviews and usage data, cutting the time to download the first 10 songs from 22–26 to 10 minutes.
- Held full design ownership of the TREBEL podcast experience from the ground up, covering usability testing, every screen, the user flows and the navigation behavior, and led its integration into the app.
- Improved and adapted the TREBEL app for iOS and Android across Mexico, Indonesia and the US, tailoring features and configurations to each market.
- Led the localization of the app for the Brazilian market, including the Portuguese translation, local formats, cultural content and market-specific features.
- Created and facilitated Core Discovery and Value Proposition Design workshops that helped TREBEL prioritize its goals and understand its users, leading to better design decisions and better use of team time.

UX/UI Designer — Valiot
Sep 2018 – Jan 2019

- Studied the brewing process at Cervecería Cuauhtémoc Moctezuma and adapted the ValueChainOS platform to Heineken's needs, improving brewing efficiency by 5%.

UX/UI Designer — Rocket Business Venture
Oct 2017 – Jul 2018

Skills

Product design: UI design, interaction design, user flows, information architecture, wireframing, prototyping, design systems, theming and color tokens, mobile and responsive web design, multi-market localization

Research and strategy: UX research, usability testing, data-informed design, user journey mapping, workshop facilitation (Core Discovery, Value Proposition Design)

AI and workflow: Claude Code, prompt engineering, AI prototyping (Claude Artifacts), design system documentation in Markdown for AI workflows

Tools: Figma, FigJam, Miro, Adobe Photoshop, Adobe Illustrator, Jira, Confluence

Languages

Spanish (Native) · English (Proficient, C2) · Portuguese (Intermediate)

Education

Bachelor's Degree in Industrial Design — Tecnológico de Monterrey (ITESM)
2013 – 2018
